| Legal Framework: | <p>Since 1972, Albania has a (legislation and a regulation) regulatory framework on radiation protection, which cover all relevant radiological safety issues. In 1995 in Albania entered in force the new Radiation Protection Law approximated with international standards. In 2008 there was an amendment to the Law taking into account new security issues and increasing the independence of regulatory body.</p> <p>Law 8025 reviewed in 2008 establishes the Radiation Protection Commission (RPC) as the regulatory body for radiation safety and the security of radioactive sources. With new an amendment is increased the effective independence of regulatory Body. Members are without conflict of interest and are appointed by Council of Ministers. The RPC is responsible for enforcing radiation protection legislation. The Radiation Protection Office, placed under the authority of RPC, is the designated as executive regulatory body.</p> |
