

Milestones

Country: CUBA

Reporting Year: 2004

Start Year or Reference Year:	2002	End Year:	2004
Description of Milestone:			
The Regulation for the Safe Management of Radioactive Waste was develop and it came into force in March 2003. The Guide "Unconditional Clearance Levels for solid materials with low radioactive content and for liquid and gas discharges to the environment" came into force in 2004			
Start Year or Reference Year:	1999	End Year:	2000
Description of Milestone:			
Development of the acceptance requirements for the wastes that will be collected from the users. Wastes are segregated at the point of origin in accordance with established classification.			
Start Year or Reference Year:	1999	End Year:	2001
Description of Milestone:			
Establishment of requirements and methods for low and intermediate level waste package acceptability in the storage facility.			
Start Year or Reference Year:	1999	End Year:	2001
Description of Milestone:			
The safety analysis of the present Storage Facility was carried out in order to evaluate the possibility to use it as long term storage.			
Start Year or Reference Year:	1999	End Year:	2000
Description of Milestone:			
Decommissioning of a brachytherapy facility at the Oncology Hospital in Havana. This facility used Ra-226 sources for the brachytherapy service.			
Start Year or Reference Year:	1999	End Year:	
Description of Milestone:			
The Waste Processing Facility was put into operation. The facility is now licensed for compaction of solid waste, conditioning of disused sealed sources (except Ra-226) and storage of radioactive waste and disused sealed sources.			
Start Year or Reference Year:	1997	End Year:	2002
Description of Milestone:			
Establishment of a Quality Management System (QMS) for the radioactive waste management service, including all the stages: from the collection of waste until their storage as conditioned packages. The QMS was internally certified in the Center for Radiation Protection and Hygiene, according to the ISO 9001 Standard			

Milestones

Country: CUBA

Reporting Year: 2004

Start Year or Reference Year:	1996	End Year:	1997
Description of Milestone:			
Radiological characterization of unknown disused sealed sources			
Start Year or Reference Year:	1996	End Year:	1997
Description of Milestone:			
Chemical and radiological characterization of centralized stored low level liquid waste.			
Start Year or Reference Year:	1995	End Year:	1997
Description of Milestone:			
A National Technical Cooperation Project was developed with the IAEA. The necessary equipment for waste characterization, radiation protection and for quality and process control at the Waste Treatment and Storage Facility was supplied under this project. The personal was adequately trained.			
Start Year or Reference Year:	1988	End Year:	1991
Description of Milestone:			
The construction of the Waste Processing and Storage Facility (WPSF). The Waste storage facility was put into operation in 1988 and the centralized collection of radioactive waste was implemented around the country. The first two collection of disused sealed radioactive sources were carried out in 1988 and 1991.			
Start Year or Reference Year:	1986	End Year:	2004
Description of Milestone:			
A facility in the Oncology Hospital, contaminated with Cs-137 was decommissioned. It was a former brachytherapy facility that was used as storage facility for disused sealed sources at the beginning of eighties.			
Start Year or Reference Year:	1985	End Year:	
Description of Milestone:			
First conditioning activities were carried out in the country. Solid and liquid radioactive waste generated in research activities were immobilized.
