Comment **# 7077: Reprocessing in Overseas**

Japanese nuclear utilities entrust the two overseas companies BNFL (UK) and COGEMA (France) with reprocessing of spent fuel in total about 7,100 tU.

Uranium and Plutonium recovered from reprocessing of spent fuel are returned to each Japanese company as recycled nuclear fuel. At the same time, radioactive waste, a by-product of reprocessing, is also returned.

Waste management facilities that are located at this site:

Facility:	BNFL
Description:	British Nuclear Fuel plc. / Sellafield (Magnox, Thorp)
