*For further information, please contact the Responsible Officer via e-mail:
NEWMDB@IAEA.org*

Waste Classification Schemes

Country: LITHUANIA

Reporting Year: 2007

Waste Class Matrix: **IAEA Def.**

This country does use the IAEA Scheme: No

Description: The Agency's standard matrix

Waste Class Name	Distribution %		
	LILW-SL	LILW-LL	HLW
LILW-SL	100.0	0.0	0.0
LILW-LL	0.0	100.0	0.0
HLW	0.0	0.0	100.0

Waste Class Matrix: **National**

Description: * - Groups 1, 2 and 3: according to the Old Classification System

Waste Class Name	Distribution %		
	LILW-SL	LILW-LL	HLW
VLLW (A)	100.0	0.0	0.0
LLW-SL (B)	100.0	0.0	0.0
ILW-SL (C)	100.0	0.0	0.0
LLW-LL (D)	0.0	100.0	0.0
ILW-LL (E)	0.0	100.0	0.0
Group-1*	100.0	0.0	0.0
Group-2*	100.0	0.0	0.0
Group-3*	0.0	100.0	0.0

Comment **# 447: Waste Classification**

The radioactive waste is classified into 6 classes VLLW (A), LLW-SL (B), ILW-SL (C), LLW-LL (D), ILW-LL (E) and spent sealed sources (F) in accordance with requirements of the "Regulation on the Pre-Disposal Management of Radioactive Waste at Nuclear Power Plant" (VD-RA-01-2001, see Attachment # 184). However, the so called Old Classification System (based on Former Soviet Union regulation SP-AS-88) is still applied for unprocessed Group-1 and Group-2 waste, processed for handling (size reduction) Group 3 waste and processed for storage (compaction) Group-1 combustible waste, which will be retrieved from old storage buildings, processed for disposal (Group-1 and Group-2 waste), processed for long-term storage (Group-3 waste) and reclassified according to the classification system in force.

This old classification system of radioactive waste was formally abandoned when the "Regulation on the Pre-Disposal Management of Radioactive Waste at Nuclear Power Plant" was adopted in 2001 (VD-RA-01-2001, see Attachment). However, the old classification system is still applied at Ignalina NPP not only for the historical, already stored waste but also for the new produced waste. The new classification system is applied in the planning of the radwaste processing in the new waste management facilities.

Definition of «unprocessed waste» and «processed waste»:

This country uses the following definitions:

	as-generated waste	processed for handling	processed for storage	processed for disposal
Unprocessed means:	x			
Processed means:		x	x	x

Groups Overview

Country: LITHUANIA

Reporting Year: 2007

Reporting Group:	NATIONAL
Inventory Reporting Date:	December 2007
Waste Matrix Used:	National

License Holder(s): Ignalina NPP

Comment # 404: Concrete Tanks

Concrete tanks for spent resins and evaporator concentrates (sludge)

Comment # 405: SRS

Since the late 1980s SRS were shipped to INPP. Over the years, until late in 2000, the disused SRS were dumped, together with other wastes, into various storage areas of SB155/1, SB157 and SB157/1.

Beginning late in 2000, the disused SRS have been stored separately from other waste in the compartment in SB157/1 reserved for this waste. The SRS, still in their own-shielded packages, are loaded into cylindrical stainless steel containers for storage, which are then placed in the storage compartment.

Waste management facilities that are located at this site:

Facility:	S(B)F	
Description:	Solidification (Bituminization) Facility	
Processing part of facility S(B)F

National Systems

Policy		(Yes;Partially;No)
Q14	Has your Country implemented a national policy for radioactive waste management?	Yes
Comment	# 422: The main objective of the national policy The main objective of the national policy is provide for the set of practical actions that shall bring management of radioactive waste in the Republic of Lithuania in compliance with the radioactive waste management principles of IAEA and with the good practices in force in EU Member States.	

Strategies		(Yes;Partially;No)
Q15	Has your country developed strategies to implement a national policy?	Yes
Comment	# 413: National Strategy on Radioactive Waste Management Approved by resolution of the Government of the Republic of Lithuania No.174 dated February 6, 2002	
Attachment	#173: Questionnaire Strategy_on_Radioactive_Waste_Management.doc Strategy on Radioactive Waste Management	

Requirements		(Yes;Partially;No)
Q17	identified the parties involved in the different steps of radioactive waste management	Yes
Q18	specified a rational set of safety, radiological and environmental protection objectives	Yes
Q19	implemented a mechanism to identify existing and anticipated radioactive wastes	Yes
Q20	implemented controls over radioactive waste generation	Yes
Q21	identified available methods and facilities to process, store and dispose of radioactive waste on an appropriate time-scale	Yes
Q22	taken into account interdependencies among all steps in radioactive waste generation and management	Yes
Q23	implemented appropriate research and development to support the operational and regulatory needs	Yes
Q24	implemented a funding structure and the allocation of resources that are essential for radioactive waste management	Yes
Q25	implemented formal mechanisms for disseminating information to the public and for public consultation	Yes
Comment	# 414: Law on Radioactive Waste Management May 20, 1999, No. VIII-1190, Vilnius	
Attachment	#174: Questionnaire Law_on_Management_of_Radioactive_Waste.doc Law on Radioactive Waste Management	

Policies

Country: LITHUANIA

Reporting Year: 2007

	Responsibilities	(Complete;Incomplete)
Q28	establish and implement a legal framework for the management of radioactive waste	Complete
Q29	establish or designate a regulatory body that has the responsibility for carrying out the regulatory function with regard to safety and the protection of human health and the environment.	Complete
Q30	define the responsibilities of waste generators and operators of waste management facilities	Complete
Q31	provide for adequate resources	Complete
Q33	enforce compliance with regulatory requirements	Complete
Q34	implement the licensing process	Complete
Q35	advise the government	Complete
Q37	identify an acceptable destination for the radioactive waste	Complete
Q114	comply with legal requirements	Complete

Regulation on Pre-Disposal Management.doc

Regulation on the Pre-Disposal Management of Radioactive Waste at Nuclear Power Plant

Policies

Country: LITHUANIA

Reporting Year: 2007

	Activities	(Yes;Partially;No)
Q43	perform safety and environmental impact assessments for radioactive waste management facilities	Yes
Q44	ensure adequate radiation protection for workers, the general public and the environment	Yes
Q45	ensure suitable staff, equipment, facilities, training and operating procedures are available to perform the safe radioactive waste management steps	Yes
Q46	establish and implement a quality assurance programme for the radioactive waste generated or its processing, storage and disposal	Yes
Q47	establish and keep records of appropriate information regarding the generation, processing, storage and disposal of radioactive waste, including an inventory of radioactive waste	Yes
Q48	provide surveillance and control of activities involving radioactive waste as required by the regulatory body	Yes
Q49	collect, analyze and, as appropriate, share operational experience to ensure continued safety improvements in radioactive waste management	Yes
Q50	conduct or otherwise ensure appropriate research and development to support operational needs in radioactive waste management	Yes

Comment **# 416: An inventory of radioactive waste**

As soon as possible correlations linking hard-to-measure radiologically relevant radionuclides to easily measurable gamma-emitters should be developed where possible for each waste stream and the validity of these correlations should be checked at predetermined intervals.

Comment **# 417: Retrieval of old accumulated solid radwaste**

The low and intermediate level solid waste previously classified as Group 1 and 2 being stored on the Ignalina NPP site, containing mainly short lived radionuclides, shall be retrieved for characterization followed by conditioning and subsequent storage/disposal.

Comment **# 7447: Storage and disposal plans**

The Ignalina NPP decommissioning process will generate large volumes of very low, low, intermediate and high-level radioactive waste. It is generally considered necessary to have a Licensed Landfill for very low level waste (VLLW) in operation in 2013 and a Near Surface Repository (NSR) for short-lived low- and intermediate-level waste (LILW) in operation in 2016. It was decided that interim storage facility should be built in stages (modular design) for storing operational short-lived waste. It will be the possibility for future extensions in order to provide storage of waste packages generated during decommissioning after 2010, if necessary. The new interim storage facility should be also capable of storing the unprocessed long-lived waste. Therefore new interim storage facility will be designed for 50 years operation.

	Clearance	(Yes;No)
Q128	Does your country have "clearly defined clearance levels based on radiological criteria, with policy statements that material below those levels can be recycled or disposed of with non-radioactive wastes"?	Yes
Q129	Has your country ever used a "case-by-case" approach to clearing radioactive wastes (excluding spent/disused sealed radioactive sources)?	No
Q130	Has your country ever used clearance levels to dispose of, reuse or recycle radioactive waste as non-radioactive waste or as a non-radioactive resource (excluding spent/disused sealed radioactive sources)?	No

Disposal Facilities

Policies

Country: LITHUANIA

Reporting Year: 2007

Licensing		(Yes - All;Yes - Some;No)
Q53	Environmental Assessment (EA)	Yes - All
Q54	Environmental Impact Statement (EIS)	No
Q55	Performance Assessment (PA)	Yes - All
Q56	Quality Assurance (QA)	Yes - All
Q57	Safety Assessment (SA)	Yes - All
Q59	If Quality Assurance is part of your Country's current, waste disposal facility licensing policy, does the QA Program conform to international standards (such as the ISO9000 series)?	Yes - All

Comment **# 419: Near surface repository**

Reference design of a near surface repository (NSR) for low- and intermediate-level short-lived radioactive waste has been accomplished in 2002. Environmental Impact Assessment for three candidate sites has been performed in 2005. The NSR operation is planned in 2016

Comment **# 420: Landfill repository for very low level radwaste**

According to project B19, executed by the INPP, a new disposal facility for very low level waste (VLLW) shall be designed and built. It is planned to install the VLLW repository disposal modules on the site near the INPP. The Landfill for VLLW operation is planned in 2013.

Operation		(Yes - All;Yes - Some;No)
Q60	Does your Country have formal, documented waste acceptance criteria for its operating or proposed disposal facilities?	Yes - All

Comment **# 421: Generic and preliminary WAC**

Generic waste acceptance criteria (WAC) for conditioned LILW candidate for near surface disposal and requirements for waste package specifications (WPS) have been approved by the State Nuclear Power Safety Inspectorate in 2003 (see P-2003-01, our Reference No 9).

Preliminary WAC for a NSR has been approved by Radioactive Waste Management Agency (RATA).

Policies

Country: LITHUANIA

Reporting Year: 2007

Post-Closure		(Yes;No)
Q61	Does your Country have any written policies to address the maintenance of records that describe the design, location and inventory of waste disposal facilities?	Yes
Q62	If the answer to the previous question was YES, does your Country have any policies, laws or regulations that prescribe what records are to be maintained?	Yes
Q63	Does your Country have any written policies to address active institutional controls or passive institutional controls, such as monitoring or access restrictions?	Yes
Q65	access restrictions	Yes
Q66	drainage and/or leachate collection system(s)	Yes
Q67	leachate treatment systems	No
Q68	environmental monitoring	Yes
Q69	facility monitoring	Yes
Q70	surveillance	Yes
Q71	plans for intervention measures during active institutional control if there is an unplanned release of radioactive materials from the disposal facility	Yes

Attachment **#176: Questionnaire**

Regulation on Disposal of LILW.doc

Regulation on Disposal of Short-Lived Low- and Intermediate-Level Waste

Policies

Country: LITHUANIA

Reporting Year: 2007

Processing/Storage

Policies/Procedures		(Yes;No)
Q73	waste sorting/segregation	Yes
Q74	waste minimization	Yes
Q75	waste storage	Yes
Q76	processing and/or storing and/or disposing of nuclear fuel cycle waste separately from non-nuclear fuel cycle waste (also known as nuclear applications waste)	Yes
Q78	Does your country have any legislation, regulation, or policy that waste processing must take place prior to storage (see following note)	Yes

Comment # 423: Regulation on the Pre-Disposal Management

See attachment No. 175 at Policies/National Systems/Responsibilities
 "Regulation on the Pre-Disposal Management of Radioactive Waste at Nuclear Power Plant"

Implementation		(Yes;No)
Q80	In your Country are there any waste processing facilities at the same location where the waste is generated?	Yes
Q81	In your Country are there any centralized waste processing facilities?	No
Q82	In your Country are there any mobile waste processing facilities?	No

Foreign		(Yes;No)
Q121	Has your country sent any wastes or spent fuel to another country for processing (reprocessing for fuel)?	No
Q124	Has your country accepted any wastes or spent fuel from another country for processing (reprocessing for fuel)?	No

Policies

Country: LITHUANIA

Reporting Year: 2007

Spent/Disused SRS

Registration		(Yes;No)
Q84	Is there a national level registry?	Yes
Q85	If answer was yes, is the registry used only for disused/spent SRS?	Yes
Q87	Are there regional-level registries (one or more)?	No
Q90	Are there local-level registries (one or more)?	Yes
Comment	# 427: A national level registry	
	A national level registry of all Lithuania's SRS is administrated and supervised by Radiation Protection Center. Radioactive Waste Management Agency (RATA) have another national level registry of spent SRS transferred or to be transferred to RATA as radioactive waste. INPP has a local level registry.	
Procedures		(Yes;No)
Q91	Does your Country have documented procedures in place to ensure that sealed radioactive sources (SRS) are transferred to secure facilities in a timely manner after their user declares them to be spent?	Yes
Agreements		(Yes;No)
Q93	Government to Government agreements	No
Q94	Government - Supplier agreements	No
Q95	Supplier-User agreements	Yes
Q97	Do any agreements include suppliers that are outside of your Country?	Yes
Release / Disposal		(Yes;No)
Q99	Does your Country have any regulations to free-release spent sealed radioactive sources (SRS)?	No
Q100	Has your Country disposed of spent SRS in existing disposal facilities for LILW or HLW waste?	No
Q101	Does your Country plan to dispose of spent SRS in existing or planned disposal facilities for LILW or HLW waste?	Yes
Q102	Has your Country implemented dedicated disposal facilities for spent SRS?	No
Q103	Does your Country have plans to implement dedicated disposal facilities for spent SRS?	No
Comment	# 429: Management of disused SRS	
	Disused SRS are managed separately from other radioactive waste.	
Comment	# 430: Spent SRS with long-lived radionuclides	
	These disused radioactive sealed sources that could not be reused or sent back to the supplier are treated without the final immobilization until the final WAC for a NSR and a deep geological repository are established.	
Attachment	#178: Questionnaire	
	LAND 34-2000_angl.doc	
	Normative document of environmental protection of the Republic of Lithuania "Clearance Levels of Radionuclides, Conditions of Reuse of Materials and Disposal of Waste".	

Policies

Country: LITHUANIA

Reporting Year: 2007

Import-Export

Radioactive Waste		(Yes;No)
Q104	Does your Country have laws or Regulations restricting either the import or export of radioactive waste (excluding spent fuel)?	Yes
Comment	# 431: Prohibition on import of radwaste See Article 42 of the Law on Nuclear Energy	
Comment	# 432: Re-entry of disused SRS Pursuant to Article 30 of the Law on Radioactive Waste Management, a return into Lithuania of disused SRS is permitted, if they are intended for the legal person who manufactured them and who is authorized to receive and keep the disused SRS.	
Attachment	#179: Questionnaire Law_on_Nuclear_Energy.doc Law on Nuclear Energy	

Spent Fuel		(Yes;No)
Q105	Does your Country have laws or Regulations restricting either the import or export of spent fuel?	Yes
Comment	# 433: Import of SNF According to Article 2 of the Law on Nuclear Energy: "Radioactive waste - spent nuclear fuel and other radioactive materials the further technological use whereof is either not advisable or impossible". According to Article 42 of the Law on Nuclear Energy: "It shall be prohibited to import radioactive waste into the territory of the Republic of Lithuania".	

Liquid HLW

Storage		(Yes;No)
Q106	Does your Country have high-level liquid wastes in storage?	No

UMMT

Responsibility		(Yes;No)
Q110	Does your Country have any Uranium Mine and Mill Tailings sites that do not have a designated authority to manage them?	No

Policies

Country: LITHUANIA

Reporting Year: 2007

Decommissioning

Funding

(Yes - All;Yes - Some;No)

Q111 Does your Country require that funds should be set aside in support of future waste management activities, such as decommissioning activities? Yes - All

Comment # 439: Law on INPP Decommissioning Fund

Ignalina NPP's decommissioning fund was established by the law No. IX-466 on July 12, 2001

Comment # 7448: Ignalina NPP decommissioning

There is only one nuclear power plant in Lithuania - Ignalina NPP with two similar RBMK-1500 Units. The The first Unit was shutdown at 31 December 2004, and second Unit will be shutdown by the end of 2009. Decommissioning of the Unit 1 is in progress in accordance with the Immediate Dismantling Strategy.

Facilities

(Yes;No)

Q119 Does Your Country have any nuclear fuel cycle facilities? No

Q120 Does Your Country have any nuclear applications facilities (non fuel cycle facilities)? Yes

Timeframe

(Yes - All;Yes - Some;No)

Q113 Does your Country require a time frame for the decommissioning of non-nuclear fuel cycle facilities once these facilities cease operation? No

Attachment #180: Questionnaire

VATESI_VD-EN-01-99-Decommiss.doc

General Requirements for Decommissioning of Ignalina NPP
