Decommissioning and Dismantling:	
Legal Framework:	<p>Luxembourg has legislation and regulation on radiation protection, which cover all relevant nuclear and radiological safety issues, since 1963. The regulatory decrees are revised periodically in order to be in conformity with the provisions of the Directives of the European Union of which Luxembourg is a Member State.</p> <p>The legislative and executive competence in the field of radiological safety and radiation protection is attributed to the Minister of Health. The law of 21 November 1980 concerning the organization of the Directorate of Health defines a department of radiation protection (DRP) and allocates particular missions to all departments within the Directorate of Health. Similarly to a number of other small countries, the DRP centralizes as a single department all competence of radiation and nuclear safety. The DRP is at the technical level in charge with the preparation of draft text for laws, regulations and decrees. These drafts are then submitted to the department of legal affairs of the Ministry of Health for coordination of the legislative procedure. The DRP also defines the conditions for licenses. It has further issued several guides.</p>
