Comment **# 9740: Policies National Systems-Clearance**

According to the NSR-01 the clearance levels are defined. The regulation NDR-02 on the clearance levels of materials originated from nuclear activities establishes the methodologies for approving by competent authority of the conditional and unconditional clearance levels of materials arising from nuclear activities including from decommissioning.

Q90	Are there local-level registries (one or more)?	Yes
Q115	If the answer was yes, are any registries used only for disused/spent SRS?	Yes

Comment # 9741: Policies Spent SRS-Registration

Each autorised waste management facility has own registry destined only for the disused/spent sealed radioactive sources.

Q97	Do any agreements include suppliers that are outside of your Country?	Yes

Comment # 9743: Policies Spent SRS-Agreements

The import of sealed radioactive sources is issued to the authorised importers. The importers have to have the agreements with users in case the sealed sources become disused or spent sources. These agreement stipulate the obligation of the user to resent the spent sealed sources to the original supplier or to transfer the spent sealed sources as radioactive waste to a authorised waste management facility.

Comment # 9744: Policies Spent SRS-Release / Disposal

Th free relase of SRS are prohibited in Romania. Each SRS has to be transfered to an authorised waste management facility. In Romania there is a disposal facility which can accomodate the SRS.
