Comment # 7277: Atlantic Ocean Disposal Volumes

Between 1949 and 1967 over 34,000 containers were reported disposed. Most waste was put into a cement matrix in steel drums (210 liter or 300 liter). Waste volume information is not cited in the available references, so an assumption of 0.25 cubic meters/drum or 8,600 m3. This volume has significant uncertainty.
